GENERAL: the ideal Oriental is a svelte cat with long, tapering lines, very lithe but muscular. Excellent physical condition. Eyes clear. Strong and lithe, neither bony nor flabby. Not fat. Because of the longer coat the Longhair Division appears to have softer lines and less extreme type than the Shorthair Division.

HEAD: long tapering wedge, in good proportion to body. The total wedge starts at the nose and flares out in straight lines to the tips of the ears forming a triangle, with no break at the whiskers. No less than the width of an eye between the eyes. When the whiskers (and face hair for the Longhair Division) are smoothed back, the underlying bone structure is apparent. Allowance must be made for jowls in the stud cat.

SKULL: flat. In profile, a long straight line is seen from the top of the head to the tip of the nose. No bulge over eyes. No dip in nose.

NOSE: long and straight. A continuation of the forehead with no break.

MUZZLE: fine, wedge-shaped.

CHIN and JAW: medium size. Tip of chin lines up with tip of nose in the same vertical plane. Neither receding nor excessively massive.

EARS: strikingly large, pointed, wide at the base, continuing the lines of the wedge.

EYES: almond shaped, medium size. Neither protruding nor recessed. Slanted towards the nose in harmony with lines of wedge and ears. Uncrossed.

BODY: long and svelte. A distinctive combination of fine bones and firm muscles. Shoulders and hips continue the same sleek lines of tubular body. Hips never wider than shoulders. Abdomen tight. Males may be somewhat larger than females.

NECK: long and slender.

LEGS: long and slim. Hind legs higher than front. In good proportion to body.

PAWS: dainty, small, and oval. Toes: five in front and four behind.

TAIL: long, thin at the base, and tapered to a fine point. Longhair Division: tail hair spreads out like a plume.

COAT (Shorthair Division): short, fine textured, glossy or satin-like, lying close to body.

COAT (Longhair Division): medium length, fine, silky, without downy undercoat, lying close to the body, the coat may appear shorter than it is. Hair is longest on the tail.

COAT COLOR: the Oriental's reason for being is the coat color whether it is solid, shaded, smoke, parti-color, bi-color or tabby patterned.

Solid – In the solid color cat, the coat color should be of uniform density and color from the tip to the root of each hair and from the nose to the tail. The full coat color score (20) should be used to assess the quality and the correctness of the color.

Shaded – The shaded cat has a white undercoat, with a mantle of colored tipping shading down from the sides, face and tail from dark on the ridge to white on the chin, chest underside and under the tail.

Smoke – Cat in repose appears solid in color. In motion the color is clearly apparent. Extremities are solid in color, and have a narrow band of white at the base of hairs next to the skin which may be seen only when the fur is parted.

Parti-Color – A solid* cat with patches of red or softly intermingled areas of red on both body and extremities (presence of several shades of red acceptable; *dilute colors exhibit cream instead of red).

Bi-Color – Bi-Colors should conform to the established standard for their co-existing pattern, with the addition of white feet, legs, underside, chest and muzzle, including an inverted “V” blaze on the face.

Tabby – In the tabby patterned cat, the quality of the pattern is an essential part of the cat. The pattern should match the description for the particular pattern and be well defined. The pattern should be viewed while the cat is in a natural standing position. The remaining ten points are allotted to the correctness of the color, it matches the color description.

EYE COLOR: green. Pointed and white – blue. White and bi-color – blue, green or odd-eyed.

PENALIZE: crossed eyes. Incorrect eye color. Palpable and/or visible protrusion of the cartilage at the end of the sternum.

DISQUALIFY: any evidence of illness or poor health. Weak hind legs. Mouth breathing due to nasal obstruction or poor occlusion. Emaciation. Visible kink in tail. Miniaturization. Lockets and buttons. Incorrect number of toes. Longhair Division: definite double coat (i.e. downy undercoat).

Tabby Color Class

CLASSIC TABBY PATTERN: markings dense, clearly defined, and broad. Legs evenly barred with bracelets coming up to meet the body markings. Tail evenly ringed. Several unbroken necklaces on neck and upper chest, the more the better. Frown marks on forehead form an intricate letter "M." Unbroken line runs back from outer corner of eye. Swirls on cheeks. Vertical lines over back of head extend to shoulder markings which are in the shape of a butterfly with both upper and lower wings distinctly outlined and marked with dots inside outline. Back markings consist of a vertical line down the spine from butterfly to tail with a vertical stripe paralleling it on each side, the three stripes well separated by stripes of the ground color. Large solid blotch on each side to be encircled by one or more unbroken rings. Side markings should be the same on both sides. Double vertical rows of buttons on chest and stomach.

MACKEREL TABBY PATTERN: markings dense, clearly defined, and all narrow pencillings. Legs evenly barred with narrow bracelets coming up to meet the body markings. Tail barred. Necklaces on neck and chest distinct, like so many chains. Head barred with an "M" on the forehead. Unbroken lines running back from the eyes. Lines running down the head to meet the shoulders. Spine lines run together to form a narrow saddle. Narrow pencillings run around body.

SPOTTED TABBY PATTERN: markings on the body to be spotted. May vary in size and shape with preference given to round, evenly distributed spots. Body spots may subtly suggest a mackerel or classic pattern but may not be connected and preference given to spots in a random pattern. A dorsal stripe runs the length of the body to the tip of the tail. The stripe is ideally composed of spots. The markings on the face and forehead shall be typically tabby markings. Underside of the body to have "vest buttons." Legs and tail are barred. On the upper chest there are one or more broken necklaces.

TICKED TABBY PATTERN: body hairs to be ticked with various shades of marking color and ground color. Body when viewed from top to be free from noticeable spots, stripes, or blotches, except for darker dorsal shading. Lighter underside may show tabby markings. Face, legs, and tail must show distinct tabby striping. Cat must have at least one distinct necklace.

PATCHED TABBY PATTERN: a patched tabby is an established Classic, Mackerel, Spotted or Ticked Tabby in blue*, chestnut, cinnamon, ebony, fawn* or lavender*, or any of these colors in silver, with patches of red or softly intermingled areas of red on both body and extremities (presence of several shades of red acceptable; *dilute colors exhibit cream instead of red). **Nose leather and paw pads:** same as non-patched tabbies, may be mottled with pink.

Bi-Color Color Class

Bi-colors should conform to the established colors and patterns for parti-colors, shadeds, smokes, solids and tabbies with the addition of white. Calicos should be a white cat with unbrindled patches of blue*, chestnut, cinnamon, ebony, lavender* or fawn* with patches of red or softly intermingled areas of red (presence of several shades of red acceptable; *dilute colors exhibit cream instead of red). Van pattern color should be confined to the extremities, except that one or two small patches on the body are allowable. As a preferred minimum, all bi-colors should have white feet, legs, underside, chest and muzzle. Less than this minimum should be penalized proportionally. Nose leather and paw pads conform to the established standards.

POINTED AND WHITE should appear to the eye as a bi-color.

Colors should conform to the established Oriental colors and patterns with the addition of white overlaid with the pointed color restriction. Thus, the non-white parts of the cat vary from the intense expression of color on the points to a paler manifestation of that color on the body (darkening with age is allowed, and may be more pronounced than in non bi-color pointed cats). In younger cats, especially the paler base colors, the contrast is subtle but distinct, and will increase with age. The face and the body should exhibit substantial white (a minimum of one-third is preferred). On the body, the white will show most commonly on the legs, chest, undersides, shoulders, and various spots on the body. There must be some white on the face, with substantial white (a minimum of one-third, or enough to indicate an inverted "V") being preferred. Small spots of color are allowed within the white, both on the face and on the body. **Eye color:** blue. **PENALIZE:** lack of inverted "V"; less than one-third white. **DISQUALIFY:** no white on face.

VAN POINTED AND WHITE should appear to the eye as a van patterned cat. The face and body should be predominantly white with coloration confined to the extremities: head, tail and legs. One or two small patches of body shading are allowable. Because the van pointed and white is predominantly white, the white on the face will most likely extend beyond any white "V" blaze, but a minimum of white on the face would be one-third of the mask. Any point restricted color or body color would be as described in the pointed and white description. **Eye color:** blue. **PENALIZE:** less than two-thirds white. **DISQUALIFY:** no white on face.

COLORS (all patterns of pointed and white bi-colors): the eight base point colors are seal, blue, chocolate, lilac, cinnamon, fawn, red and cream and include the "parti-colors" of seal, blue*, chocolate, lilac*, cinnamon, or fawn* with patches of red on both body and extremities (presence of several shades of red acceptable; *dilute colors exhibit cream instead of red). Base point patterns may be solid point and white, shaded point and white, smoke point and white, lynx point and white (including silver), and calico point and white. **Body:** even, subtle shading is permissible, but clear color is preferable. Allowance should be made for darker color in older cats, but there must be definite contrast between body color and points. **Points:** (except for white overlay) mask, ears, legs, feet, tail dense and clearly defined; all of the same shade.
