RATIONALE: Judges have pointed out that the use of the terms “Sable Sepia”, “Champagne Sepia” and “Platinum Sepia” are redundant and that the word “sepia” needs to be removed from those color/pattern combinations. Also, a few colors/patterns were omitted when attempting to list all colors/patterns - accidentally omitted colors/patterns are added. This also corrects some errors in colors. No new colors are added to the breed, as our breed has always come in all colors and patterns. All corrections here are made within the “sepia” descriptions only.

RagaMuffin allowable outcross breeds: ~~none.~~ Selkirk Rex Longhair (straight hair variant), for kittens born on or before July 31, 2030. All kittens born after July 31, 2030 must have only RagaMuffin parents.

RATIONALE: The RagaMuffin breed is in need of an outcross. Breeders presently need fresh bloodlines and are finding cats are too related. Breeders have even imported cats back from Europe, but these cats came from the same foundation cats in America. Some health issues are beginning to occur, as lines have many of the same cats behind them. We have lost

major breeders in the recent years, two foundation breeders dying that maintained a number of diverse cats. Unfortunately, most of their cats were not placed in breeding homes.

We have talked to the Selkirk Breed Council Secretary, and she has no objection to placing this question on the Selkirk Rex ballot. This is a win/win for both breeds, as presently many of these straight haired cats are not retained in a breeding program. Our breed will be able to put these fresh bloodlines to very good use. The head type, being rounded in the right places, having a nice short muzzle, and puffiness to the whiskers makes for a decent match. They also have a good personality, which is important in our breed. The Selkirk currently uses the Persian as an outcross, and the Persian was used in the development of the RagaMuffin. We do not believe that the Persian Breed council will be agreeable to us using their cats at the present time, and when polled a couple years ago, they responded in a negative manner. In discussions within our council, we agreed upon the straight haired variant of the Selkirk Rex Longhair. We wish to expand our bloodlines, and keep our breed healthy and strong.

(All other accepted colors/patterns as defined in the Show Standards and Any Other RagaMuffin colors that are not described in other color classes.)

AOV.....None None

RATIONALE: The RagaMuffin has a larger number of “& White” cats being shown overall, especially in the tabby pattern. In the past we asked for several color classes based upon all our major color breakdowns. It was suggested that we ask for fewer classes, better supported by our overall numbers. Taking this advice and studying our registration numbers, along with what is being shown, our largest categories are tabby & white (with 270 cats), and then after removing the tabby & white cats, all other bicolors (with 359 cats). As a result, we are asking for these two additional color classes. All other RagaMuffins (without white – solid, shaded, smoke, sepia, mink, tabby, and parti) will then compete in the same color class, leaving a decent balance of cats in the “other” category.
